

Operating Systems (O.S)

B Introduction to Operating Systems & architecture

* Operating Systems

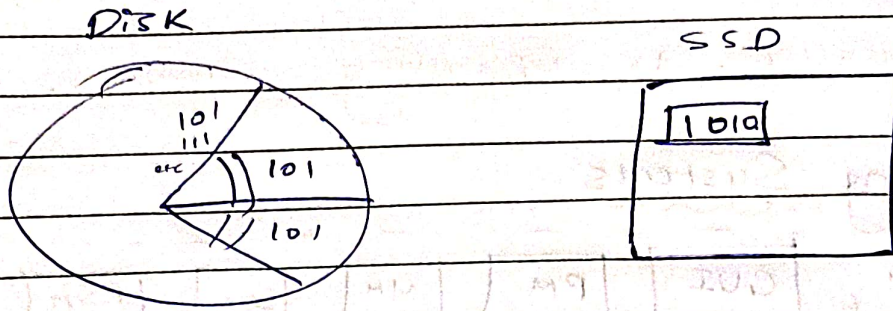

* How the System starts on?

POST -> Post on System test

↓
1st ppgn running in system.

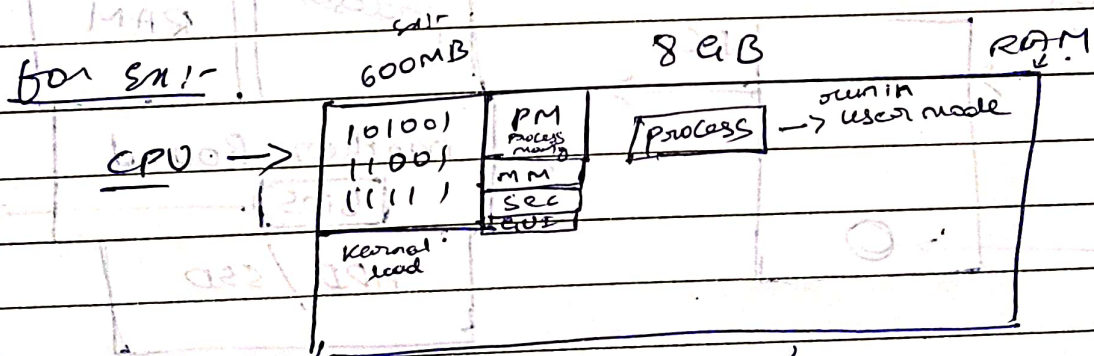

→ This kernel code means the kernel code which is in the disk / SSD, → which will read & copy to the RAM & then the pro call the processor to execute.

This all work will do that one prgm called Boot loader.

→ The Boot loader is present in 1st sector.

→ This is also called Memory Boot record (MBR).

→ This go to RAM & then the O.S.

→ kernel is programed in C language.

→ kernel is not a process it will the 1st before the process.
